

SOUFIANE MJOUH

Software & Web developer

ABOUT ME

A boy born and bred in Brussels who has roots and not shy to claim them. Graduated in "Applied computer science". I'm an active and sporty - Black belt Tae-Kwon-Do - young man.

I feel myself home in a new environment where I can find and learn everything, more and more, I am really eager to learn about all what touches the ICT world. Easy going, I know how to find my own way !

3350 Linter, Belgium
- www.makeitsolid.be
soufiane.mjouh@makeitsolid.be
- (+32) 0483 62 62 32

MY SKILLS

- Back-end (PHP, Java, J2E ...)
- Front-end (HTML/CSS/JS ...)
- Mobile (Android/Hybrid ...)
- Network & Security
- Project Management

WORK EXPERINCE

DATACENTER AUTOMATION DEVELOPER

Proximus, Evere | April 2017 - Current

In this really interesting project, Proximus made a CMDB tool that is used internally for the maintenance of their datacenter. This tool acts as a central management system for all created networks and network components for customers of Proximus. You can see this tool as a homemade MS Azure or AWS Amazon. But don't say it too loud ! :-)

BACKEND DEVELOPER

IDWeaver | January 2017 - April 2017

IDWeaver is a web agency for e-marketing, web sites, email marketing and search engine optimization. Hereby I was a backend developer to play a pivotal role in a team of 7. The main used languages were mostly Web related languages (HTML/PHP/JS).

FULLSTACK DEVELOPER

Federal Police | October 2016 - January 2017

It happens that the Belgian Federal Police must confiscate evidence and objects during their investigations and searches. The purpose of this mission is to develop the tool that will be used for the traceability of the confiscated evidence.

EDUCATION

BACHELOR - APPLIED COMPUTER SCIENCE

Odisee, Brussels | 2011-2015

I got my Bachelor Degree at Odisee University in Brussels. In these years I acquired a lot of computer skills and trained my communication and management skills. I created websites, software applications, learned to create Windows & Linux networks and manage them and a lot more things... And I loved it !

INFORMATICS & BUSINESS MANAGEMENT

Stanford University | 20 Sep 2010-Current

I was graduated from high school Regina Pacisinstituut in Laeken in 2011. Had a lot of fun with friends and teachers there ! Learned the basics of Computer science and Business management. I also got a Business Management Certification, what allowed me to start my own business !
